

Fractions, Decimals, and Percents

Fractions, decimals, and percents can be used to represent numbers.

To convert between fractions, decimals, and percent, the following diagram might be helpful:

Example

Fraction (lowest terms)	Decimal	Percent
$\frac{16}{5}$		
		64%
	0.0045	

Percent units _____ have a _____ sign after them.

Practice the following:

Required - Page 135 #4 - 9, 11, 12

Optional (challenge yourself!!!) - Page 136 #13, 21

Outcome:

N3 - Demonstrate an understanding of percents greater than or equal to 0%
